1. With reference to recent discussions with ITW Philadelphia Resins, USA, the deadweight loading limit for Chockfast Orange PR610TCF is being increased from 7 kg/cm² (0.7N/mm²) to 9 kg/cm² (0.9N/mm²) provided the bolt loading is not less than 2.5 times the deadweight loading for engine installations and provided the total loading limit for all chocking installations remain unchanged.
2. This being effective immediately.
