Date 13th June, 1988.

Dear Sirs,

Track Record and Performance of
PR610TCF Chockfast Orange

We refer to your recent visit in respect of the above.

The loadings shown on the graph I PRC 5.5.86 are acceptable providing that for temperatures above 80°C or chock loadings above 35 kg/cm² there is an exotherm or post cure temperature of not less than 40°C.

A single copy of PCR 5.5.86 suitably endorsed is returned herewith.

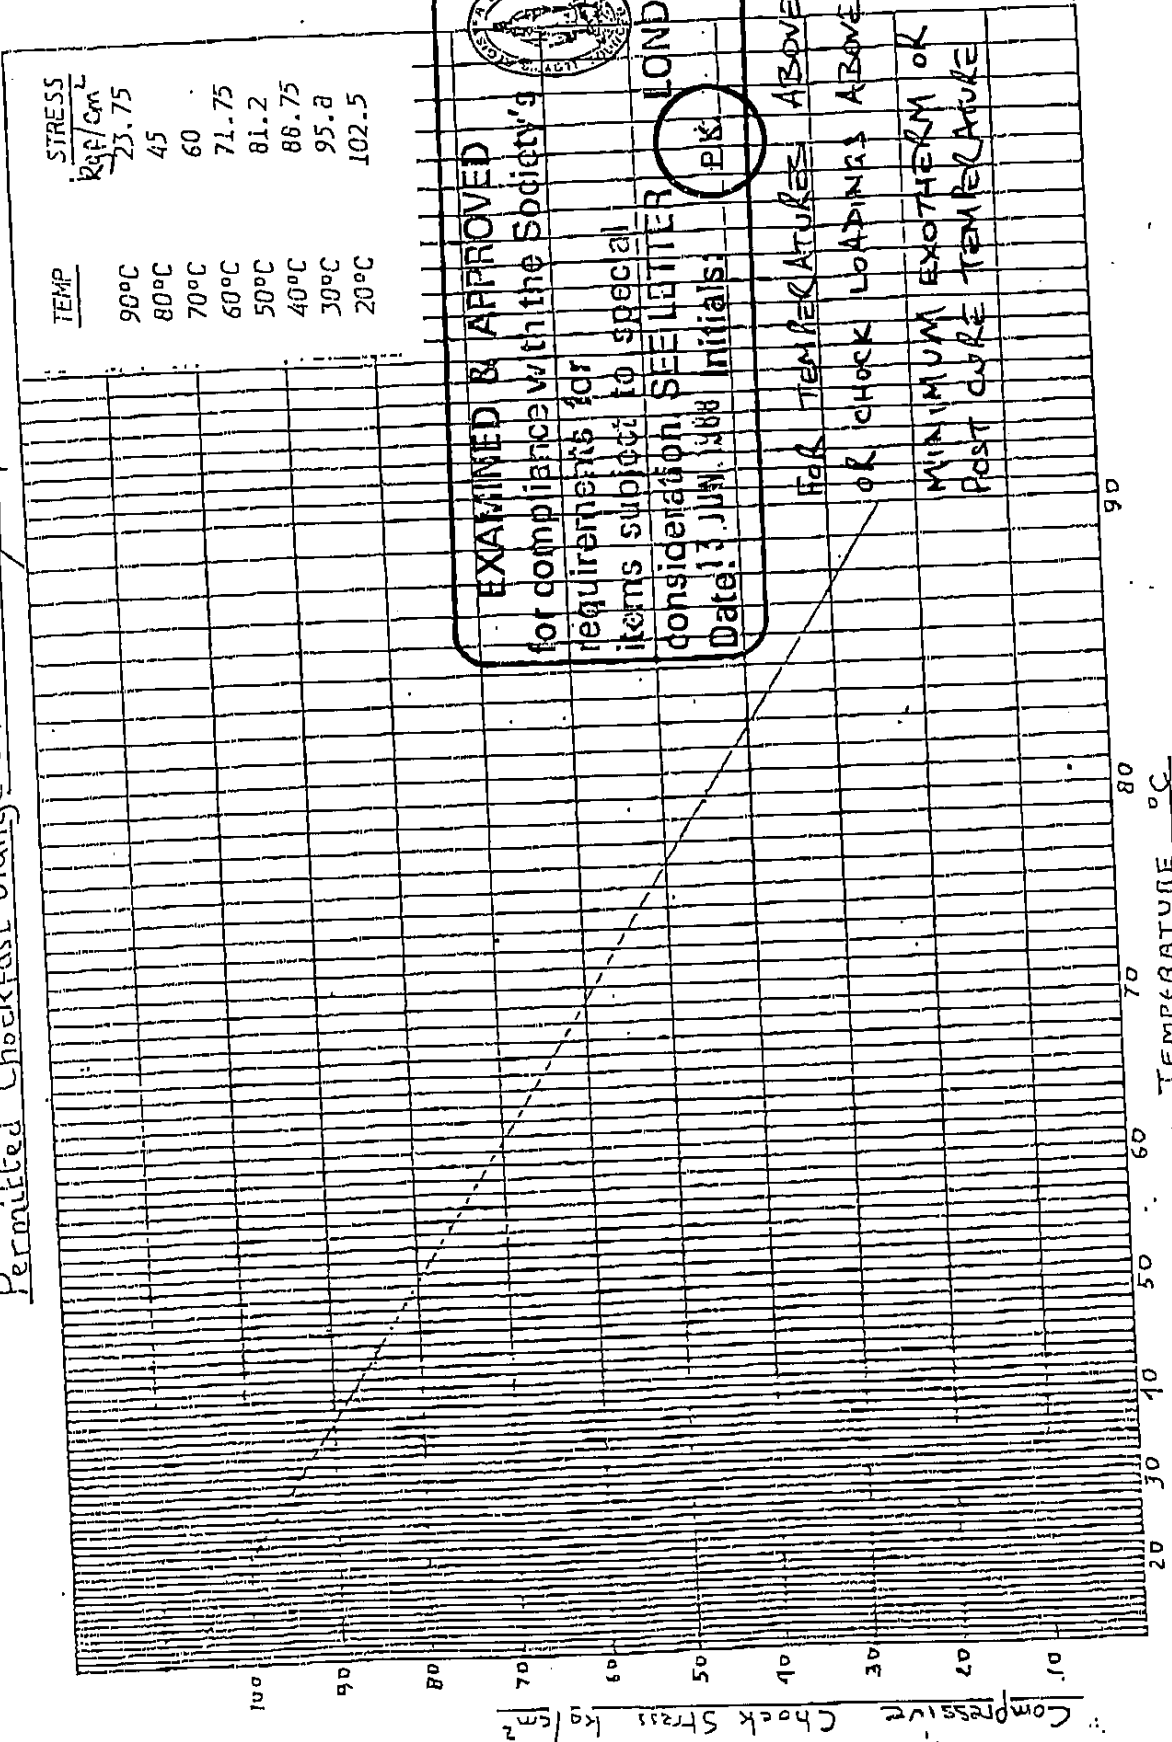

Yours faithfully,

P. Koller
Senior Surveyor
Machinery Design & Dynamics
